Sir,

I am a boy of 12 years of age. I believe very much in UFO's. On Dec 31, 1967, I noticed a small white light, about the size of a star, travel<sup>very</sup> southerly. I thought it was a satellite, but it went much too fast for one. It then began to "flash" red and white and head towards the southwest and drop straight down. I would like a very reasonable explanation, if Dr Hyneck can make one up. If he says it is something like swamp gas, etc, he can forget sending me that answer. I said I wanted a reasonable answer, which Dr Hyneck, or yourself, for that matter can give. ~~It~~

Sincerely,

P.S. - send me some information on UFO's
